Frequently Asked Questions

How do I get started?

Get the Math was designed as a series of modules, each containing interrelated videos and interactive challenges that build on each other to explore an Algebra I topic. From the homepage, <http://www.getthemath.org>, click “THE SETUP” to view an introductory video, then select one of the topics (Math in Music, Fashion, Videogames, Restaurants, Basketball, or Special Effects) to get started on one of the modules. You can also access the modules via the “THE CHALLENGES” page, and view the video segments on the “VIDEO” page.

How can I incorporate *Get the Math* into my algebra curriculum?

Standards-aligned lesson plans, editable handouts, and answer keys with multiple strategies for each of the modules are available in the “TEACHERS” section of this website. We have also included sample related assessment items, both multiple choice and open-ended questions, for each of the modules, as well as a video of a teacher using one of the modules in the classroom. Self-paced online lessons for students, focusing on the Math in Music, Math in Fashion, and Math in Videogames modules, are also available on the Teachers Domain website at <http://www.teachersdomain.org/special/GTMI/>. These units are intended to reinforce skills and themes presented in the classroom and provide an opportunity for students to reflect upon the content and to save notes online for them and their teachers to review.

I’m having trouble viewing videos and/or interactives on the *Get the Math* site.

What should I do?

Check to make sure you have a current version of Adobe Flash Player installed on your computer. The **Get the Math** site should run properly on most web browsers including Internet Explorer (with the exception of IE version 6), Safari, Mozilla Firefox, etc. if Adobe Flash Player is installed. If you don’t have Flash Player installed, you can download it for free from the Adobe website at <http://www.adobe.com/support/flashplayer/downloads.html>. If you are having trouble with your internet connection, a downloadable version of the first three modules is available in the “TEACHERS” section of <http://www.getthemath.org>.

How can I connect with other educators using *Get the Math*?

We encourage you to “Like” our Facebook page at <http://www.facebook.com/GetTheMath> and join the conversation! You can also follow our Twitter feed [@getthemath](http://twitter.com/getthemath).

When will *Get the Math* be airing on public television?

Get the Math premiered in 2011 and has been distributed to public television stations nationwide by American Public Television. Check your local station’s listings to find out if the show will be airing in your area.

Where can I learn more about the professionals and students who appear in *Get the Math*?

Check out our Q&A’s at “Meet the Pros” and “Meet the Teams” in the “ABOUT” section of <http://www.getthemath.org>.

Get the Math is a production of THIRTEEN in association with WNET, and made possible by grants from The Moody’s Foundation and the Next Generation Learning Challenges. Special thanks to Texas Instruments TIInspire™ Handheld Technology.
